Question: 1. Nearest star to the earth is _____.

- Option A. Alfa Centaury
- Option B. Sun
- Option C. Proxima Centaury
- Option D. Dog Star

Question: 2. Presently the farthest planet from the Sun is _____.

- Option A. Pluto
- Option B. Neptune
- Option C. Uranus
- Option D. Venus

Question: 3. Planet with maximum satelllites is _____.

- Option A. Earth
- Option B. Saturn
- Option C. Jupiter
- Option D. Pluto

Question: 4. Which planet is called 'red planet'?

- Option A. Mars
- Option B. Jupiter
- Option C. Mercury
- Option D. Venus

Question: 5. Which planet is called 'Double Planet'?

- Option A. Venus
- Option B. Uranus
- Option C. Pluto
- Option D. Earth

Question: 6. Largest satelllite in Solar System is ____.

- Option A. Moon
- Option B. Ganymede
- Option C. Europa
- Option D. Cheron

Question: 7. Sun-rays reaches earth in (approximately)

- Option A. 8 seconds

- Option B. 8 minutes
- Option C. 4.3 seconds
- Option D. 1 light year

Question: 8. Largest planet of our Solar System is _____.

- Option A. Jupiter
- Option B. Mars
- Option C. Saturn
- Option D. Uranus

Question: 9. Smallest planet of our Solar System is _____.

- Option A. Pluto
- Option B. Earth
- Option C. Venus
- Option D. Mercury

Question: 10. Brightest planet of our Solar System is _____.

- Option A. Venus
- Option B. Mercury
- Option C. Uranus
- Option D. Saturn

Question: 11. Hale Bopp' is a newly discovered _____.

- Option A. Planet
- Option B. Meteore
- Option C. Satellite
- Option D. Comet

Question: 12. Charon' is the satellite of _____.

- Option A. Earth
- Option B. Saturn
- Option C. Pluto
- Option D. Neptune

Question: 13. A family or system of millions and millions of stars are called _____.

- Option A. Universe
- Option B. Solar System
- Option C. Galaxy
- Option D. Asteroids

Question: 14. A system of millions and millions of galaxies are called _____.

- Option A. Solar System

- Option B. Universe
- Option C. Space
- Option D. Constellation

Question: 15. The name of our galaxy is _____

- Option A. Alfa Centauri
- Option B. Proxima Centauri
- Option C. Milky Way
- Option D. Neptune

Question: 16. What is the shape of our galaxy 'Milky Way'?

- Option A. spiral
- Option B. elliptical
- Option C. circular
- Option D. spherical

Question: 17. Orion and Great Bear stand for _____.

- Option A. star
- Option B. planet
- Option C. Solar System
- Option D. Constellation

Question: 18. Our Solar System is an orderly community of _____.

- Option A. One star
- Option B. Two stars
- Option C. Three stars
- Option D. Four stars

Question: 19. How many planets does our Solar System consist of?

- Option A. 9
- Option B. 6
- Option C. 7
- Option D. 10

Question: 20. The word 'planet' means ____.

- Option A. wanderer
- Option B. pollution
- Option C. celestial body
- Option D. heavenly body

Question: 21. A celestial body having its own heat and light is called

- Option A. Planet

- Option B. Moon
- Option C. Star
- Option D. Satellite

Question: 22. A celestial body which revolves round a planet just as a planet revolves round the Sun is called _____.

- Option A. Moon
- Option B. Asteroid
- Option C. Satellite
- Option D. Great Bear

Question: 23. A celestial body which revolves round the Sun and receives heat and light from it is called _____.

- Option A. Planet
- Option B. Orion
- Option C. Satellite
- Option D. Star

Question: 24. A swarm of small bodies in between the two Planets of Solar System is called 'asteroids' which are those two Planets?

- Option A. Mars and Jupiter
- Option B. Earth and Venus
- Option C. Neptune and Pluto
- Option D. Jupiter and Saturn

Question: 25. The word 'satellite' means _____.

- Option A. wanderer
- Option B. settlement
- Option C. light
- Option D. a smaller companion to anything

Question: 26. Which of the following planets is called 'blue planet'?

- Option A. Venus
- Option B. Earth
- Option C. Mars
- Option D. Uranus

Question: 27. Big Bang Theory' explains

- Option A. the formation of universe
- Option B. the origin and evolution of earth's crust
- Option C. formation of Solar System
- Option D. formation of constellation

Question: 28. Sun revolves around galaxy once in every 250 million years, this length of time is called _____.

Option A. Cosmic or Galactic Year

Option B. Mean Solar Year

Option C. Sidereal Year

Option D. Leap Year

Question: 29. Planet nearest to the earth is _____.

Option A. Venus

Option B. Mercury

Option C. Mars

Option D. Jupiter

Question: 30. Planet with nearly equal rotation and revolution time to the earth is _____.

Option A. Venus

Option B. Mercury

Option C. Uranus

Option D. Mars
